

HR 910
Blue Correspondence

MAY 17 1984

Thomas E. Shook, Chief
Technology Support Division
Department of the Army
Pine Bluff Arsenal
Pine Bluff, Arkansas 71611

Dear Mr. Shook:

In March of 1984 we received Technical Memorandum No. 14 and Appendices for Pine Bluff Arsenal. We have reviewed this report and request the following information for consideration before comments or suggestions can be made.

Since these reports were prepared in September of 1981 there is a two year gap between this information and your current status. Please forward me reports or data that fills this gap and explains the current status of monitoring results and status of any remedial construction activities that has taken place.

This current information would greatly help in reviewing and commenting on the "Installation Restoration" program presently underway at your facility.

Please send this information and direct all questions to Tim Perdue of my staff at 214-767-9715.

Sincerely,

Russell Bartley, Chief
Operations Section, 6AW-SO

bcc: S. Nott, Chief
Superfund Branch, 6AW-S
